Breed: Katahdin
Date of Birth: 1/25/17
Blood Work: RR

Registration Number: 136165

Sire: USD 14381

Dam: NWT 316

Delivery Options: EAPK Symposium

Website: Current EBV's: <http://nsipsearch.nsip.org/#/details/6400522017nwt045>

Note: NWT 7045 is a proven ram in three flocks with 132 progeny enrolled in NSIP. He was bred by Roxanne Newton of Hound River Farm in 2017. He has sired lambs extensively at Waldoview Farm and Charmingfare Farm in addition to Old Slate Farm. He was born in cluster #1 and has daughters retained in clusters #2 and #3. He would really help new or less connected producers develop cross flock connections and accuracy. He is a well balanced ram with good accuracy and will make a great addition to any flock. He will have GEBV's when they are available this summer. He tested negative for CL/Johne's/OPP/CAE on 5/27/21. His current weight is 210lbs. He will be onsite at the EAPK symposium. Transportation can be arranged back towards Ohio after the sale. Other delivery options including the KHSI expo are possible. Please contact Brad Carothers 740-398-1279, oldslatefarm@gmail.com to arrange prior to the sale.

Offering: 6400052021WVF006

Breed: Purebred

Recent Weight: 83 lbs on 6/19/21

Type of Entry (single / Pen of 3): Single Entry

Dam Production Record (Year 1): 2 born 2 raised

Note: Biosecurity Screening: Tested negative for OPP, CL, and Johne's thru WADDL on 6/8/2021. See report in photos. We used TL 1862 on our top ewes this past fall and this ram lamb really expresses the correctness of his sire while capturing the maternal strengths of his dam. This RR ram lamb is especially well balanced across growth, maternal, and parasite resistance traits. He excels at Maternal Weaning

Weight (1.23) placing him in the top 5%. His excellent Number of Lambs Weaned EBV (16.6%) leads to a strong USA Hair Index of 109.5 landing him in the top 10%. If you are looking for a ram to develop or strengthen your maternal lines, WVF 1-1006 will set you on that path.

Comments: In addition to the traditional Katahdin Maternal Traits and Growth, our program emphasizes carcass traits (muscling). Our farm, Buckeye Acres, has always emphasized carcass traits in all of our livestock, the more muscling/pounds an animal produces -- the more value that animal has, the bigger your check. The last photo is 3544, sire of 4002.

Hoof Color: Black

Recent Weight: wean wt= 3/9 --59lb/60 day ; 5/3= 94 lbs ; 6/24 = 130 lbs

Note: Nice colored ram with good growth and balanced numbers. This ram was born and raised on pasture with minimal mixed grain fed. Our flock is tested for OPP, CL and Johnes. This ram was also BioSecurity tested shortly before the sale. Both Sire & Dam are colored. He was born and raised a twin. We used 'Merlin' on a select group of ewes that we felt would offer offspring that is structurally correct. We are fairly new to NSIP, but over the years we have selectively chose replacements that can perform and maintain BCS on a primarily grass based diet. He will be on site at the EAPK Symposium in Abingdon, VA.

Note: Nice spotted ewe with good growth and balanced numbers. This ewe was born and raised on pasture with minimal mixed grain fed. Our flock is tested for OPP, CL and Johne's. This ewe was also BioSecurity tested shortly before the sale. Both Sire & Dam are colored. She was born and raised a twin and her sister is also consigned to the sale (see Lot 44). We used 'Merlin' on a select group of ewes that we felt would offer offspring that is structurally correct. We are fairly new to NSIP, but over the years we have selectively chose replacements that can perform and maintain BCS on a primarily grass based diet. She will be on site at the EAPK Symposium in Abingdon, VA.
