Website: bluestemt看.com: <https://bluestemt看.com>

Note: BTX Bluestem Farm produces registered Katahdins in a forage-based operation with a breeding emphasis on parasite resistance and maternal traits. All lambs are fed only mother's grass, browse and hay. Lambs are fully vaccinated for CD/T and pneumonia. All breeding stock have tested free of CL, OPP and Johne's. BTX 22-31 is a product of genetics from Hound River (NWT) and USDA Booneville (USD) and has very good parasite-resistance EBVs – PFEC in the 80th percentile for the breed. His MWWT is in the 65th percentile, and yearling weight EBV is above average. He is one of our fastest growers. His weight/growth characteristics are: Actual birth weight 10.3 lb. (twin); Average gain through weaning (90 days) 0.85 lb./day; Raising adjusted weights 63 lb. (60-day) and 86 lb. (90-day); Recent actual weight 90 lb. on 6/25/2022.

Comments: Weight on July 3rd: 200 lbs

Facebook: Waldoview Farm on Facebook: <https://www.facebook.com/waldoviewkatahdins>

Website: Katahdinsforsale.com: <https://www.katahdinsforsale.com>

Note: Lot 11 is a yearling ram, WVF 1-1014, who was the standard ram lamb from 2021. He was one of the top ram lambs for growth that we've had in 15 years. His sire is the outstanding ram from and Larry Weeks, TLF 1862, who excels on number weaned a maternal milk, and whose lambs are head and shoulders (literally) above those from our other sires. We used WVF 1-1014 on a few ewes last fall and got outstanding lambs (See Lot #12 for proof of that!). WVF 1-1014 is a balanced ram with his greatest strengths MWWT (90th percentile), WWT (98th percentile), and PWWT (90th percentile). Together with NLB and NLW both at 85th percentile genetics would work in a variety of management systems. Take him home and put him to work. Biosecurity is important to us. We are currently testing on a rotating portion of our ewe flock every year. You can have confidence, Lot 11 tested negative for CL, Johnes, OPP and cryptosporidiosis on 6/24/2022.

Lot 12 Waldoview Farm

Lot Details

Sale Contact: Tom Hodgman: call or text anytime 207-852-2744 email at tom@katahdinsforsale.com

Comments: Weight on June 26th: 107 lbs

Facebook: Waldoview Farm on Facebook: <https://www.facebook.com/waldoviewkatahdins>

Website: KatahdinsForSale.com: <https://www.katahdinsforsale.com>

Note: Lot 12 (WVF 2-1129) is a fantastic son of Lot 11 weighing 107 lbs on June 26th. His dam is an excellent young ewe that was our top parasite resistant ewe lambs in 2019. WVF 2-1129, structure correct, has a great coat, and is solid built. He is a well-balanced overall and in the top 10% (90th percentile for all of the growth and reproductive traits. His USA Maternal Hair index of 103.9 puts him just shy of the 95th percentile. If you're looking for a new sire for your hard-working production ewe line, Lot 12 is for you. Biosecurity is important to us. We conduct testing on a rotating portion of our flock every year. You can bid with confidence, Lot 12 tested negative for CL, Johnes and OPP on 6/24/2022.

Lot 13 Waldoview Farm

Lot Details

Tag: WVF 2-1160

Class (age): February Lamb

Date of Birth: 2/18/2022

Sex: Ram

DNA (Codon 171): QR

Registration Number: Pending

Sire Name: TLF 1862

Sire Registration Number: 146245

Dam Name: WVF 9-781

Dam Registration Number: 176280

Sale Contact: Tom Hodgman: call or text anytime 207-852-2755 email at tom@katahdinsforsale.com

Comments: Weight on June 26th: 95 lbs

Facebook: Waldoview Farm on Facebook: <https://www.facebook.com/waldoviewkatahdins>

Website: KatahdinsForSale.com: <https://www.katahdinsforsale.com>

Note: Lot 13 (WVF 2-1160) has impressed me from the start. \TLF 1862 as his sire, his growth took off from the start despite being a triplet. His young dam is from one of our top maternal ewe lines his GEBVs reflect that with NLB and NLW both in the 97th percentile. Add to that strong growth GEBVs for WWT 98th percentile and PWWT at 96th percentile, this ram really excels where it counts. Coming in from pasture, he tipped the scale at 95 lbs on June 26th. Don't miss out on this opportunity to add these outstanding genetics to your program. Biosecurity is important to us. We conduct testing on a rotating portion of our ewe flock every year. You can bid with confidence, Lot 13 tested negative for CL, Johnes and OPP on 6/24/2022.

Lot 14 Waldoview Farm

Website: KatahdinsForSale.com: <https://www.katahdinsforsale.com>

Note: Lot 14 (WVF 2-1133) is an extremely solid ewe lamb, and together with Lot 15, represent some of the best female genetics we have ever produced. Another TLF 1862 progeny speaks for itself on the dam's side she traces to some of the early New England genetics though much improved over several generations. Her dam is known for producing strong genetics for muscling as well as growth and maternal skill. WVF 2-1133 excels at MWWT (1.3 so ~95th percentile) NLB at 24% (98th percentile) and NLW at 19% (~90th percentile) so together with a dynamite body, she will make an outstanding brood ewe. Her twin sister remains in our keeper group. Here's a chance to own some outstanding maternal genetics in a balanced package. Biosecurity is important to us. We conduct a rotation on a rotating portion of our ewe flock every year. You can bid with confidence, Lot 14 tested negative for CL, Johnes and OPP on 6/24/2022.

Lot 16 Hound River Farm

Location of Animals: Fombell, Pa.

Sale Contact: Tom Perkins 724 480 5187

Comments: We are a grass based rotationally grazed system. never creep feed our lambs. 2204 sorts himself to the top of his contemporary group pretty quick. This twin ram lamb ranks in the top 25% of the breed for WWT. He is in the top 40% for PFEC. If you looking for a ram that will produce in a grass based system, this will work for you.

Note: Weight as 5/28/22 was 90 pounds.

Sale Contact: Ron Young 419-203-6389, roncyoung@gmail.com

Comments: 100% Katahdin. We are so appreciative to Roxan Newton for allowing us the opportunity to purchase 054, an exceptional son of her "Twelve" stud ram. 054 is in the top 2% PWWT and the top 30% for MWWT. We were able to breed 054 to the top set of our ewe lambs and select a son of 054 that will move our flock forward!!! As you can see 054 has grown out to be a beautiful animal. This will be a great opportunity for someone to purchase a ram that is elite for PWWT that will connect you with both Roxan's flock and the Buckeye Acres flock.

Website: Buckeye Acres: <http://www.countrylovin.com/BuckeyeAcres/katahdins.htm>

Note: NWT 054, both he and his offspring are early shedders. 054 has black hooves. 054 is a plus 5.95 PWWT, making him one of the "Twelves" top sons for PWWT. 054 has an excellent disposition and is easy to work with. 054 has excellent overall structure. He finishes quickly. Weight on 7/07/2022 - 255 lbs.

Comments: 4294 is a December 9th,2021 born ram lamb. 429 plus 4.02 PWWT and a plus 2.47 WWT , MWWT is a plus .159 US Hair is 101.88. 4294 is sired by Buckeye Acres 3730 who's gaining quite a reputation for siring extra muscle and growth . . . the 3rd from last photo. Please note the extra substance to 4294 well as his structural correctness. We've included 2 photos at the end of 3730 sons that have sold in 2022.

Website: Buckeye Acres: <http://www.countrylovin.com/BuckeyeAcres/katahdins.htm>

Note: About the Buckeye Acres Flock. From the onset we've emphasized Muscling and overall mass and volume in both our rams and ewes(Phenotype).Meat lamb buyers pay a premium for muscle in the right places !! Many of our breeding stock customers see our flock for that " muscling". 2022 marks the 10th consecutive year we have NOT de-wormed our brood ewe flock. We rely on Natural Immunity through our brood ewes to assist our lamb worm proofing. With great success I might add. 4294 is 100% Katahdin. Weight 7/07/2022- 155lbs Compare 4294's 1st photo with his sires - 3 photos. Wow !!!! Do they look alike or what ???

Comments: 4218's dam, Buckeye Acres 2568, has birthed and raised 14 lambs in 7 lambings in 6 years. Productivity. Besides 4218's dam productivity record, she exemplifies a brood with high overall structural correctness, muscling, spring of rib and width of base. Great for either a grass or grain based operation. 4218 is tan/brown in color with black hooves. 4218 is RR at codon 171

Website: Buckeye Acres: <http://www.countrylovin.com/BuckeyeAcres/katahdins.htm>

Note: 4218 is 100% Katahdin. About the Buckeye Acres flock. From the onset we've emphasized muscling, plus overall mass and volume in our rams and ewes. This ram sports an average GEBV birth weight (facilitated birthing ease), followed by rapid growth. His FEC scores are respectable for the Katahdin breed making him a balanced ram. This ram is NSIP Maternal Certified. His DNA has been submitted to NSIP, as has his parentage on both sides back 3 generations. This ram has gorgeous caramel coloring and mild disposition round him out as an attractive breeding candidate.

Website: NP Ranch: <https://npranchtx.com/>

Note: US Hair Index: 104.53 (**97th percentile**) BWT: 0.19 (percentile) WWT: 2.52 (*85th percentile*) PWWT: 4.086 (*79th percentile*) MWWT: 1.398 (**95th percentile**) WFEC: -31.0 (percentile) PFEC: -38.77 (58th percentile) NLB: 0.095 (62nd percentile) NLW: 0.183 (**92nd percentile**) This ram is possibly the best yet produced by NP Ranch. He has high maternal merit as reflected by a Hair Index in the top 3%, predicted to help with rate of pounds weaned. His birth weight is in the average range, facilitating birthing ease. Data indicates an outstanding potential for early growth and FEC scores are solidly within the average range for the breed, making him a balanced ram. He would be a strong addition to flocks wanting to strengthen milk production and mothering ability, as reflected by a MWWT in the top 5%. He has been 50k Genes and has 3 generations of DNA information on his sire's side. This handsome and hardy fellow is personable and likes to be handled.

Comments: Pen contains three of the most parasite resistant

yearlings in our flock born in 2021 while still in top 10% of the flock for Maternal Index. Their sire, BCH981 is in the top 1% of breed Index. The ewes are parasite resistant. PFEC top 10 & 15% of flock (PFEC = -82, -84 & -77%). RMK 1142 & 1143 are TT at TMEM (less susceptible to OPP. RMK 1158 is TC and thus carrying one resistant allele for OPP. All three have been genotyped with 5C Ovine Chip.). Links to EBVs,

Lot 65 Lamb Rake

Lot Details

Offering: Lamb Rake (Qty 1)

Video: : <https://www.youtube.com/watch?v=et0KegAtQWA&>

Comments: Best thing since pre-printed ear tags!

Delivery Options: Free at EAPK & KHSI Expo

Approximate Weight: 1.5 lbs

Note: Lamb Rakes are used to carry new born lambs in a way "no human touch" and allows the lamb to appear to be walking naturally and fully visible by the dam, encouraging the dam to pick up the lamb with less hesitation. This is superior to slings in several ways, including easy to pick up lamb with one hand, lamb stay naturally in place during transit and weighing, and the ewe can see and smell her lamb during the process. LAMBS NOT INCLUDED!!!
