**Blood Work:** RR  
**Sire:** Meinders 1162  
**Dam:** Meinders 8104  
**Dam's Sire:** CMG 16-103  
**Comments:** 2293 is the best ram we got out of our first round

of embryo transfer work! Moderate framed, huge topped and and more rear end than any Katahdin I've seen. Sired by Meinders 1162, the popular ram now working for Jeremy Cantrell. His ET dam is our most proven ewe and cranks out good lambs every time. Fall born coming yearling who'll be able to breed a lot of ewes right away! He has 10 maternal sisters in our flock!!

## Lot 15 - NP Ranch (NPR 42)

### Lot Details

**Date of Birth:** 07-09-2019

**Birth Type:** TW

**Sex:** Proven Ram

**Recent Weight:** 225

**Sire:** 6400052018WVF633

**Dam:** 6400602017RMK985

**Dam's Sire:** 6400292016CMG084

**Ebv Link:** 6400602019RMK064: <http://nsipsearch.nsip.org/#/details/6400602019rmk064>

**ID - Tag:** NPR 42

**Breed:** 100% Katahdin with only a 1.8% inbreeding coefficient

**Age:** 4

**Codon171:** RR

**Comments:** Adjusted to include July NSIP updates: Don't miss out on this proven ram who has more than 50 progeny. We hate to sell him, but we have retained too many of his daughters in our breeding program. This brown and white classic has a superior hair coat. He was bred by James Morgan & Teresa Maurer of Round Mountain Farm, pioneers of the modern Katahdin breed. He is backed by NSIP breeding records extending to the early 1990s. He has a sturdy/moderate-sized frame and possesses an easy-to-manage disposition. Scrotal circumference is in the exceptional range, at 40 cm. His Katahdin Index score places him in the top 8% of the breed. His reproductive EBVs indicate a high potential for prolificacy and lamb survival to weaning, with the NLW in the top 8%. EBVs indicate he would be a strong boost to flocks wanting to strengthen milk production, mothering ability, and number of pounds weaned, without sacrificing what the Katahdin breed is known for in terms of good parasite resistance and growth. This ram had been 50K genotyped and is NSIP MATERNAL AND STUD CERTIFIED. He has been persistently healthy, never requiring treatment for any sickness, malady, or parasitic condition. DNA confirms parentage, 171-Codon RR, and desirable TMEM154 of 1,4 (less susceptibility to OPP). He is a balanced and proven ram who will make an excellent addition to any flock.

## Lot 16 - NP Ranch (NPR 140)

### Lot Details

**Date of Birth:** 2-18-2023

**Birth Type:** SG

**Sex:** Ram Lamb

**Recent Weight:** 81 lbs (6-13-23)

**Sire:** 6400602019RMK064

**Dam:** 6400602021RMK162

**Dam's Sire:** 6400312019BCH981

**Ebv Link:** 6402172023NPR140: <http://nspisearch.nsip.org/#/details/6402172023NPR140>

**ID - Tag:** NPR 140

**Breed:** 100% Katahdin

**Codon171:** QR

**Comments:** Adjusted to include July NSIP updates: This

February ram is one of our longer-bodied spring lambs. His rich brown color and dark legs give him a polished look. He rates in the top 20% on the Katahdin Index and the top 13% in MWWT (indicators of strong maternal merit). His reproductive EBVs show good potential for prolificacy and high lamb survival to weaning with the NLW at the 70th percentile. He is respectably balanced, with all major EBVs ranging from 58% to 87% (averaging 71%). Parasite resistance is notable, with WFEC and PFEC above the 75th percentile. NSIP parentage data goes beyond 3 generations (view sire details in lot 15 of this sale - NPR 042). If you are looking for a well-balanced ram with strong maternal EBVs, this would be the ram for you. He is Codon QR and less susceptible to OPP (TMEM154 of 1,4).

**ID - Tag:** NPR 157

**Breed:** 100% Katahdin

**Codon171:** QR

**Comments:** Adjusted to include July NSIP updates: This March ram is a white beauty with a few small patches of honey coloring. His NSIP numbers are among the best from our spring lambs, with strong growth measures (WWT 93%, PWWT 91%), good parasite resistance (WFEC 73%, PFEC 60%), and a respectable Katahdin Index score (76%). Reproductive EBVs show good potential for prolificacy and high lamb survival to weaning. All major EBVs range from 60% to 93% (averaging 75%). NSIP parentage data exceeds 3 generations. His sire is from Beyond Blessed Farms (Chris and Many Fletcher). He has black hooves and scurs. NSIP MATERNAL CERTIFIED. If you are looking to enhance growth and parasite resistance in your flock, this is the ram for you. He is Codon QR. OPP resistance has not yet been

measured.

## Lot 18 OSF 23018 - Old Slate Farm

### Lot Details

**Date of Birth:** 2/23/23

**Birth Type:** Twin

**Sex:** Ram

**Recent Weight:** 110 lbs.

**Sire:** USDA 20106

**Dam:** OSF2027

**Dam's Sire:** WRI17137

**Ebv Link:** EBV Link: <http://nsipsearch.nsip.org/#!/details/6401802023osf018>

**Rear Type:** Twin

**Codon171:** RR

**Special Terms or Conditions:** Will be onsite at EAPK Symposium

**Sale Contact:** Brad Carothers (740) 398-1279

**Note:** This flashy ram is out of one of our 'Tex' WRI17137 daughters who now are the foundation of our flock. His sire is our USDA ram who is among the top 10-15% of the breed for growth, parasite resistance, and maternal index. This lamb is an improvement on his parents in growth and will excel in any pasture-based system. We focus heavily on weaning weight and parasite resistance as we find sheep who top the breed in these traits perform on pasture. Top 2% WWT, top 5% PWWT. Balanced maternal traits. Hair Index and PW FEC in the top 25% of the breed.

## Lot 19 - OSF 23051 Old Slate Farm

**Sale Contact:** Brad Carothers (740) 398-1279

**Note:** It can be hard to find a ram lamb with extreme parasite resistance without losing your growth traits or maternal performance. You don't need to sacrifice using this ram in your flock. Top 2% of the breed for WFEC and PWFE, excellent parasite resistant traits, with good numbers across the board. He is from a dam line that has been very successful for us. Born and raised a triplet with no shepherd intervention.

## Lot 20 - OSF 23120 Old Slate Farm

### Lot Details

**Date of Birth:** 3/11/23

**Birth Type:** Twin

**Sale Contact:** Brad Carothers (740) 398-1279

**Note:** Excellent growth putting him in the top 2% WWT top 5% PWWT, good parasite resistance and well balanced overall. Not the most cooperative on picture day, but he is a nice, well built ram lamb. Great hair coat, shed slick early on.

## Lot 21 - OSF 23029 Old Slate Farm

### Lot Details

**Date of Birth:** 2/26/23

**Birth Type:** Single

**Sex:** Ewe

**Sire:** USDA 20106

**Dam:** OSF 1948

**Codon171:** QR

**Special Terms or Conditions:** Will be onsite at EAPK Symposium.

**Sale Contact:** Brad Carothers (740) 398-1279

**Note:** Very good growth traits (top 5% WWT and 10% PWWT) with good EBV's across the board. She has beautiful structure with good capacity. Her mother is from our original Wade-Jean Farm line, and sired by our great USDA ram. She may be a single, but she left nothing on the table. She's our largest and most impressive looking ewe lamb in the crop. Her number of lambs born/weaned EBV's are in the top 20% of the breed, so despite being a single herself, she should produce nicely.

## Lot 22 - OSF 23122 Old Slate Farm

**Sale Contact:** Brad Carothers (740) 398-1279

**Note:** This ewe was a late born lamb out of a yearling ewe, but you would hardly know it. We rarely sell ewe lambs with traits like this out of our ram 'Tex' WRI17137, because they work so well in our system. We thought we could spare one this year, so offering up this workhorse type ewe lamb. These are the kinds of ewes that make us our stud rams. Top 10% WWT.

## Lot 23 - NWT 19089 ~ Gingerich Family Farms

### Lot Details

**Date of Birth:** 02/01/2019

**Birth Type:** Triplet

**Codon171:** RR

**Special Terms or Conditions:** He will be onsite at Morehead State University, contact me to discuss more delivery options.

**Comments:** Great opportunity to get in on a ram that has proven himself time and time again! NWT 19089 was one of the high selling rams at the 2019 Southwest AREC, In 2021 his first son (GFS 21061) to sell at public auction sold for \$4,500 to Hoodley Creek. I have sold 9 daughters in a few sales over the past few years and they have averaged \$1,500. Here is a ram you can take home and pay for with his first few lambs. At 4 years old he's in the prime of his life and will be able to cover ewes like no other.

**Sale Contact:** Silas Gingerich (276)870-6234

**Comments:** Adjusted to include July NSIP updates: Coloring catches the eye with this February born looker, who has a nice coat, white socks, and a helmet. He has a respectable Katahdin Index score and major EBVs ranging from 55% to 74%. Measures of maternal merit are solid, indicating a good potential for prolificacy and high lamb survival to weaning (NLW at the 69th percentile). Parasite resistance is good (WFEC 58%, PFEC 74%). NSIP parentage exceeds 3 generations (view sire details in lot 15 of this sale - NPR 042). If you are looking for a smart looking, balanced ram with good maternal EBVs, this would be the ram for you. He is Codon QR. OPP resistance has not yet been measured.

**Comments:** If we weren't keeping his brother, we'd hold on to this yearling. He's wide, deep, and he'll throw lambs which will develop quickly. PHL22044 was weaned at 81 days old and weighed 77 lbs. On 6/11/23 he weighed 193 lbs. His dam (TRB705) has delivered nothing but quality breeding stock. His sire (NWT19002) was a top-performing ram at the 2019 SWAREC ram test with exceptional parasite resistance and ADG. NWT19002 has been an exceptional mother-maker and we have kept several of his daughters. Based on our experience with his sire and dam, PHL22044 carries the pedigree top and bottom to produce some quality breeding stock.

**Comments:** This slick coated March born ram lamb will barely be 120 days old by the sale, but is exhibiting outstanding growth. Out of my best growth ram, he is in the top 1% for Weaning Weight! Putting exceptional numbers up on the board for PWWT and the Hair Index with solid numbers for MWWT and NLW as well. Plenty of stretch to his frame, but still shows thickness from the Myostatin muscling gene inherited from his grand sire "Jimmy Dean" (also in the sale). He is the top balanced numbered ram lamb with Myostatin produced in our flock this year.

**Blood Work:** RR, 4,4, MYOSTATIN CARRIER

**Special Terms or Conditions:** EAPK Symposium, Morehead KY

**Comments:** Out of a balanced, parasite resistant, Boonville ARS ram and a thick, well-muscled, myostatin ewe, JRB 22006 brings together the best of both worlds. He is wide across the back and thick. I used 22006 as a test ram last year and his offspring are excellent, but I can't keep them all. Outstanding MWWT, WWT, PWWT, and Hair Index numbers. Genomic tested as RR and has a rare 4,4 genotype providing OPP resistance. He has one copy of the Myostatin increased muscling gene. (JRB 22006 shows only one common ancestor in it's five generation pedigree with JRB 20070 so could serve as a potential semi-outcross to daughters of JRB 20070 and JRB 23022 if looking to select for the Myostatin gene.)

**Blood Work:** RR, 1,2, MYOSTATIN AFFECTED (DOUBLE COPY)

**Special Terms or Conditions:** EAPK Symposium, Morehead KY

**Comments:** This proven ram has had a profound affect on the muscling and conformation of my flock. Wide bodied, thick boned, and heavily muscled from the time he was a lamb. My kids nicknamed him "Jimmy Dean" because he

always looked like a sausage. He carries TWO copies of the Texel Myostatin muscling gene. One copy increases muscling ~5%, two copies ~10%. He will pass on one copy to ALL his offspring. Great milk and excellent growth performance numbers as well. A fully registered Katahdin with exceptional thickness, he is the product of nearly 20 years of careful selection for carcass conformation. If you are interested in bringing the myostatin gene into your flock, he will do it quick.
