Website: NP Ranch: <https://www.npranchtx.com/>

Note: If your flock needs growth, this handsome triplet-born yearling ram can help (WWT top 8%, PWWT top 30%). Post weaning fecal EBV is in the top 30%. EBVs for maternal traits cluster around breed standards. Bred and raised in an OPP-free closed flock. He has a superior coat and medium frame. NPR162 proved his feeding versatility growing up and putting on weight during a Texas drought.

Lot 32 Gibraltar Farm

Website: More Detail on GBR 3103: <https://www.gibraltarfarm.com/eapkauction/6401552023gbr103>

Note: GBR 3103 is a yearling with EBVs above the 75th percentile for all the weight, maternal and parasite resistance traits, with and Index in the 97th percentile. He is also less susceptible to OPP with a TMEM 154 genotype of 1,1. He (and the group of rams that he lives with) tested negative for CL, Johnes and OPP in May 2024. Data Submitted: * Weight: Birth, weaning, early post-weaning, post-weaning * Fecal: Weaning and Post-Weaning * Scanned PFAT and PEMD * Scrotal Circumference We do not creep feed lambs and do not feed grain to any of our lambs, rams or ewes at any time in their production cycle. Our lambs are born in the barn, raised on pasture and overwintered in the barn on grass hay.

Comments: GBR 3104 is ranked 7th on the NSIP Trait Leading Sires for WFEC as published in the Summer 2024 Hairald

Sale Contact: Etienne or Isabel Richards:

farmer@gibraltarfarm.com (315) 291-0003

Location: On site at EAPK Symposium

Facebook: Gibraltar Farm: <https://www.facebook.com/gibraltarfarm>

Website: More Detail on GBR 3104: <https://www.gibraltarfarm.com/eapkauction/6401552023gbr104>

Note: GBR 3104 is a yearling with excellent parasite

resistance (WFEC 99th percentile, PFEC 97th percentile) while still having an Index in the 80th percentile, even though these traits are negatively correlated. We like him so much that we used him as one of the sires for 2024 lam crop and he has 34 offspring in NSIP, so he will bring across flock connectivity to your farm. He is TMEM 154 genotyped as 1,3. He (and the group of rams that he lives with) tested negative for CL, Johnes and OPP in May 2024. Data Submitted: *

Weight: Birth, weaning, early post-weaning, post-weaning *

Fecal: Weaning and Post-Weaning * Scanned PFAT and

PEMD * Scrotal Circumference His offspring have birthweight and 60 day weights submitted so far, the above data will be collected over the summer and fall. We do not creep feed lambs and do not feed grain to any of our lambs, rams or ewes at any time in their production cycle. Our lambs are born in the barn, raised on pasture and overwintered in the barn on hay.

Lot 3 - New Slate NSL24862

Note: Excellent build with the data behind him, this ram lamb ought to excel in a wide range of production systems. With high growth and lamb survival EBV's - mWWT in top 1%, using this ram will help to increase the bottom line in your sheep operation. All of his lambs are eligible for full registry with KHSI, he is eligible for full registry upon hair coat inspection. Our lamb crop received artificial barber pole challenge to ensure infection prior to data collection and sale.

Lot 4 - New Slate NSL24848

Lot Details

Delivery Options: Contact us

Note: OSF2018 is a proven mature ram originally bred by Old Slate Farm and sold to Tom Perkins as a lamb where he was used in Tom's well-respected grass based NSIP operation for three years. We bought OSF2018 back from Tom to use in our commercial ewe flock and was bred to 50 commercial ewe lambs last fall. He is simply too closely related to a large portion of our flock, which is the only reason he is offered for sale. An excellent choice for a producer who is looking to add high accuracy, growth, and proven parasite resistance to their sheep flock.

Lot 6 - New Slate NSL24893

Lot Details

Animal Name: NSL24893

Nsip: 6401802024NSL893

Comments: This animal comes from a biosecurity screened flock. Any incoming animals are tested during quarantine and all "homegrown" animals are screened after reaching a year of age.

Sale Contact: Cody Brabham - (304) 939-1212

Location: Cookeville, TN

Delivery Options: On site at EAPK. Can meet along the route back to Fairmont, WV.

Facebook: Winnow Glen Farm: <http://www.facebook.com/winnowglenfarm>

Note: WGF2406 is a solid representation of what we're shooting for in a ewe lamb. She's broad in the chest, deep capacity to carry lambs, stands correct on her feet, and has excelled on our subpar pastures. Sired by an MOF ram that brings in elite parasite resistance, this ewe is one you'll want to keep ahold of. (Pictured also with her dam). We're still newer to NSIP, so our numbers won't be as "true" in some categories. Most of our ewes are first generation NSIP enrollees. WVU performs our FEC for analysis. We sample until our group reaches at least a 500 epg average before submitting data to NSIP for analysis.

Lot 9 - Winnow Glen Farm - WGF 2423

Lot Details

Animal Name: WGF 2423

Nsip: 6403142024WGF023

Sex: Ewe

Birth Date: 03/02/2024

Registration #: Pending

Facebook: Winnow Glen Farm: <http://www.facebook.com/winnowglenfarm>

Note: WGF2423 is a moderate-framed ewe lamb who should thrive in a pasture system. Get in on this one - her twin sister is in our keeper pen. I'm breaking my own rule by selling a daughter out of a ewe that I'd never sell a ewe lamb from, but luckily, her twin sister will stay on the farm. This lamb's sire is the first sheep to shed each spring and has the slickest hair coat of any Katahdin I've seen. We're just a few years into our NSIP journey, so our numbers haven't settled in to show their true expectations yet. Rest assured, this ewe will put lambs on the ground and have the maternal instincts to raise them. WVU performs our FEC for analysis. We sample until our group reaches at least a 500 epg average before submitting data to NSIP for analysis.

Lot 11 BTX Bluestem Farm 23-66

Website: TLF Katahdins: <https://tripleefarms.com/>

Note: Ram TLF 24060 reflects what is shown on paper. He has a lot of eye appeal and his EBV's continue the story. He is in the top 3% in growth traits, top 5% for maternal milk, and top 20% for post-weaning parasite resistance. Pasture raised

exclusively between April 13 to June 8. The dam, TLF 20007, raised two healthy, growthy lambs this year. She lambed as a yearling, followed by twins as a 2 year old and triplets as a three year old. EPG May 18 = NS (none seen) Contemporary Group Range (NS to 1300) AVG = 286 EPG June 22 = 4050 Contemporary Group Range (NS to 12100) AVG = 4773 April 12 - 65 lbs (Famacha 2) May 12 - 77 lbs (Famacha 1) June 8 - 88 lbs (Famacha 1) June 22 - 90 lbs (Famacha 3) The data represented above is from the July 1 data run. The searchable database is updated mid-month and therefore does not reflect the newest data run. I have included the report in the pictures for clarity.

Note: This ewe lamb is a beautiful light red color and her coat was shed clean naturally at 4 months old. She has a long, thick body to give lots of room to carry and produce lambs. Solid, black hooves and superior confirmation. She has been individually tested RR for Scrapie Codon. Our flock has been Biosecurity tested negative since in 2017 and this ewe was tested in 05/2024. We have submitted birth, weaning and early post weaning weights. We have not submitted FEC's yet on this lambing group. We run a conventional management system with grain fed only to ewes just prior to birth and through most of the lactation period. Lambs are creep fed until switched to limited feed at around 4 months.

Note: I hate to take a ram off the feed efficiency test early but wanted to offer a high quality ram lamb at the EAPK sale. His twin brother is still on test and his pedigree is back with low residual feed intake data. Residual feed intake is simply the difference between actual feed intake and expected feed intake. A low RFI means the individual ate less than expected based on their body weight and ADG. Additionally, he's got great FEC numbers without sacrificing phenotype.

Sale Contact: John Bare, DVM 515-509-3602

Location: EAPK Symposium, Cookeville, TN

Delivery Options: EAPK Symposium, Cookeville, TN

Note: We have worked hard in our flock to improve carcass traits and growth numbers as much as we can without increasing ewe mature size. This ram reflects the progress we have made with truly outstanding growth numbers. Great milk, good parasite resistance, and solid index. 24063 carries one copy of the Texel Myostatin muscling gene. One copy increases muscling ~5%, two copies ~10%. Tmem retested at GeneCheck as 1,X. (GEBVs listed from the most recent July 1 data run and not yet updated on the online database link.)

Comments: Texel Myostatin Carrier

Sale Contact: John Bare, DVM 515-509-3602

Location: EAPK Symposium, Cookeville, TN

Delivery Options: EAPK Symposium, Cookeville, TN

Note: Another ram lamb with top notch growth and balanced maternal characteristics. Exceptional weaning weight and post weaning weight with solid number of lambs born, number of lambs weaned, and index. One of the thickest lambs we raised this year. 24020 carries one copy of the Texel Myostatin muscling gene. One copy increases muscling ~5%, two copies ~10%. (GEBVs listed from the most recent July 1 data run and not yet updated on the online database link. JRB 24020 was also accidentally listed on the database link as a ewe, this was corrected prior to the July 1 run and the numbers provided above are based on being a ram.)

Lot 61 Fahrmeier Katahdins

Sale Contact: Lynn Fahrmeier 816-517-5049

Location: On site at EAPK Symposium

Delivery Options: Can deliver along I-40, I-24 & I-70 returning home on Sunday after sale. Can also deliver to KHSI Expo in Mexico Missouri.

Note: I have listed the GEBVs from the July 1st data run. GeneCheck shows this animal to test as X:4 at TMEM 154. X could be either a 2 or 3. I really like the look of this ram and feel he would work great on a pasture operation. He is thick (PEMD GEBV) and has moderate growth traits indicative of being early maturing. With his outstanding MWWT, NLW and Maternal Hair Index, his daughters should excel in any flock.

Lot 63 T8 Farms 2408

Lot Details

Location: Cookeville TN

Delivery Options: Pick up at sale or contact me to make other arrangements

Note: BTP407 is the kind of ewe lamb that we like to produce here on our rotationally grazed farm. She is a stocky ewe with

a nice depth of rib to allow her to get a good gut fill on grass alone. She is the grandduaghter of our NWT045 Curtis ram and a great granddaughter of our OSF018 Brad ram. She is in the top 10% of the breed for parasite resistance, is above average for number of lambs born and is in the top 30% of the breed for number of lambs weaned. Her US Maternal Hair index places her in the top 30% of the breed. BTP407 will make a nice addition to any forage based system.

Lot 66 Big Tom's Con-O-Creek Farms
